Works Atom. Unusual Genius.

Look very closely. You will see that the true genius of large, human or natural structures, is that they are created from the tiniest elements. Like particles, the random, small patterns of Works Atom from Works Series, create detailed accents to capture attention. A sequence of structurally brilliant designs, each Works Atom tile works smarter to make every spatial idea come to life and inspire in unusual ways.

The new Works Series has one vision, to work smarter together for every space. Every detail of Works Series works smarter to give greater versatility and drive value at the same time.

Combined with your ideas, each floor can create +Positive spaces™ which help their users thrive by letting them live, work, learn and regain inspiration every day. Each Works Series tile will prove to be the smart move for our planet's future too. As with every Interface product, they are Carbon Neutral, so they help you lower your carbon footprint with one positive step.
